

## Comeau Aerospace Inc.- Personnel Vision

This builds and expands upon our Community & Industry Vision and is concerning with the individual and those possibilities and opportunities that may exist or be created with this endeavour.

The individual can continue in or pursue a new career, or simply a job, education, training and initial involvement until the next pro-active decision that builds upon and expands the quality of life that is envisioned. The process of transforming the present reality of an individual, family, community or industry from what it is now to what is envisioned, desired or needed often takes some work.

We work to solve problems, yes, but more importantly to create something new, to do something that has never been done before. We must remember that problems are temporary, we can learn and grow from them, even as we increase our awareness, apply energy, resources, imagination and work consistently at transforming our desire and vision into fact, the alternate reality, an individual can create the future by choice.

This may take some time depending on the person, ability, opportunity, priorities, resources, available time, energy and so on, however, if by any means community, industry and enterprise can work together, a more supportive environment for the individual is possible, one that is not only full of hope and promise, but also something that changes life today.

The role of the individual, creative imagination, initiative, desire and action is extremely essential, dynamic and limitless in pure ability to make a difference, with the transformation of consciousness, creativity, productivity, opportunity and prosperity, in ways we might not imagine at first. The imagination of the individual is the unknown variable that can change everything.

Naturally, character, personality, reliability and a strong industrious work ethic is essential. Enjoying work so much that it is not work, but a passion expressed everyday in doing the things that a person loves the most is ideal. Being involved, engaged, fired up with energy, enthusiasm and imagination and really being in your zone, is the kind of people we like, and certainly wish everyone to be, to do, to have, to experience that level of intensity, happiness and quality of life, regardless of what they do.

Since character is extremely important, some political and lifestyles may be incompatible with our Vision. Aerospace in general is a strategic industry and various national, economic, industry, community elements exist in addition to advanced technology, materials, manufacturing, design engineering, plus national defence and security provisions. The right kind of character knows, understands and responds to “O Canada, we stand on guard for thee...” often promoted by Battlegroup 301 Incorporated, where people, character, true values, nation state sovereignty and thoughtful economic nationalism is important for Canada and our quality of life.

The right people, are people that understand that it is much more than buildings and machinery that make an industrial base, people that want to be part of the action no matter what, people not interested in mainstream news, but dedicated to making news, not watching sports, but being engaged in everything...community, industry, family, work and sports, people that know one person can make a difference, people that take initiative, co-operate and work to build great things together.

Active people who know things don't happen by themselves, also have the right kind of character, as it takes effort, people that create the future by action, and not always accept the totally unacceptable status quo by default, negligence, ignorance, lack of participation or involvement, people that accept personal responsibility and increase their power and capacity to transform their lives and be the one that made all the difference. That is real character, now you know how to get

## Comeau Aerospace Inc.- Personnel Vision

more than just a job, right?

It is important for you to know, that there are no limitations for the individual with creative imagination and capability to work and produce results. People with bright ideas, with inventive and innovative capacity, people who contribute to the suggestion box, no matter how many times a day, are never fired. Supervisors are not threatened by personnel regardless of credentials, experience, qualification or otherwise, the individual is esteemed and valued, the flash of genius or inspiration in addition to the everyday qualities are fundamental in the Ultimate Flying Machine Adventure.

People may and do have different work and experience backgrounds, anything can be relevant, new perspectives, perception, awareness and imagination are part of our Personnel Vision. Imagination is not a system, we are not creating more of the same, we are not engaged in knock off products, there are no robot jobs that numb, devitalize or destroy the body, mind, soul, imagination, enthusiasm, dreams and passion. With the Ultimate Flying Machine Adventure, We want this to be the most exciting and awesome place on the planet!

Since this is primarily a Product of Canada endeavour that exceeds typical Made in Canada criteria, many things may be significantly different than another enterprise for many reasons. Business as usual, globalism, selling out your country, outsourcing to make it cheap for record profits is not what we are about. The vision of superior products, services, technology and the ultimate flying machine adventure is something more up to speed, a lot more.

We are not in the exporting of jobs business either. Corporate and Government sponsored treason and genocide is totally unacceptable and criminal beyond measure. This means that the genius, work and resourcefulness of individuals or groups working together on a project, product, technology our service, or anything, do not need to worry about having their job outsourced and exported to some other country. Now, isn't that incredible?

Work and investment is a long term practical ideal, as this can benefit all Personnel far into the future in many fantastic ways. Transferring jobs, careers, opportunities and production to another jurisdiction, by betrayal and treason to Personnel is not an option. There will never be a foreman or anything like that to sabotage the job, or to make an enterprise unprofitable as a tactic to shut down an industrial facility, operation or production as an excuse to move things to some other country. The power to create wealth is related to the power and dignity of all Personnel. This is also present with the family, an enterprise, community, industry and nation and has extremely relevant options.

The ideal of solid good quality well paying family rated jobs and careers as promoted by Capital Vault Incorporated and related enterprise, is the only gold standard in our Personnel Vision. Stock market maneuvering and other short sighted decisions are not part of our Personnel Vision, or any Vision for that matter...lucky you, lucky us! All kinds of stress, problems and decisions based on the wrong criteria and values are eliminated, now, isn't that brilliant? How is the portfolio now?

There is only one boss, there is no public stock market, analyst or institutional investor calling the shots. Strategic Risk Management - Capital Vault Incorporated style...yes, from the working share-owner and private investor point of view, control, ownership, voting with comprehensive capital structure and related agreements are all part of the package. Isn't that awesome? Our ideals and vision for personnel, enterprise, technology and asset management, is a lot like the ideal community owned news and media, with the power to edit, added to own, control and vote. Real democracy is freedom, truth, justice and real freedom of speech, the ability to create an awesome future with our own aircraft, spacecraft, news and adventure is for the individual, family, industry, enterprise, community and sovereignty based on true values.

## Comeau Aerospace Inc.- Personnel Vision

So we envision a future with unlimited options, and reach for the stars...and build something really awesome and more Canadian, with conventional and advanced materials, technology, design, engines, propulsion, manufacturing and enterprise management. For those interested to mix it up a little bit or a lot, this is the place to be. In fact alternative science is a lot like creative imagination, the individual, the unknown variable, the unknown entry event.

Our Personnel Vision is more about heart and soul, to create a future without limitations, where imagination makes leaps in the transformation of consciousness, brilliant revelations, ideas, inspiration, the spark of imagination, the ember in your heart and soul that burns, yearning to create...something awesome...to create...the ultimate flying machine...

When we have an idea and vision about creating exciting career options, it is not the typical conventional employee system we have to offer. Our Personnel Vision is about working share owners, secure asset protection, private investment and all kinds of awesome opportunities, options, entities, enterprise, capital structure and securities that goes way beyond only money with non-financial options of time, resources, genius and much more. Something that is extremely rare to find anywhere. If you don't believe it, look for it, spend an hour, a day or week, let us know what you find...who is the leading edge for the individual, the private investor and working share owner.

To have and offer something full of promise is also about issuing common shares to personnel and other enterprise and business transactions. This can easily be a start bonus, a performance bonus, more shares and anything useful and beneficial for Personnel. This can generate revenue streams through dividends, account compensation, and has built in asset protection, ownership, control and voting provisions and related agreements and something you can write home about, something more interesting. Other securities exist within the overall comprehensive capital structure, and can be in general or specific products, services, technology or otherwise.

As one can imagine, Invested Personnel are much different than typical employee personnel. Even as private investors are a lot different than public investors, values, priorities, timelines, decisions, focus and interest may vary considerably. People are esteemed and valued, the individual is respected. There is no class B, only first class all the way. You can review our Investment vision.pdf for more details. Respect includes power, dignity, stability and mobility, with trust and opportunity. This one huge difference can offer a world of difference in your first choice for a career, enterprise transactions, community building, industry revitalization, investment, general and strategic enterprise development, national and civil defence and what side of the fence you are on.

Without a doubt, a huge chasm exists between globalism vs economic nationalism and creating an alternate reality, an awesome future with relevant options right now. Government and corporate sponsored treason and genocide is light years in the opposite direction of nation building. It is the individual that creates the future, destiny by action, with real vision, allegiance to Canada and a unified purpose with true values, freedom of speech, free enterprise and the ability to create an alternate reality, is our true awesome destiny, our powerful freedom of choice.

Nation building includes national sovereignty, creating jobs, careers, revitalizing communities and industry and generating an atmosphere of awesome capability, opportunity and co-operation, possibility and co-creation. This includes a supportive and empowering environment, which has encouragement, optimism, promise and hope that transforms reality and generates results. With fantastic vision and desire that can create an entirely new world, ideals that relate, align and inspire with your own heart and soul, true values, real family and family values as the building block of a civilised advanced civilisation. This is amplified with vision,enthusiasm, vibrant health and energy that enables, augments and amplifies freedom and prosperity by the creation of products, services,

technology and new wealth creation. This generates greater independence with logic, critical thinking and resolution, happiness in the heart and soul, creative imagination and magic of the individual with supercharged freedom, free enterprise and a quality of life that is nothing short of fantastic. That is real nation building, Does that interest you?

It is time to decide what side of the fence you are on, if you have not already. You can be proactive, make solid confident decisions, go forward and live the greatest adventure of all time and yes, the Ultimate Flying Machine Adventure!

Long term enterprise, industry and community development is a lot different than short sighted control, limited vision and liquidated industry and production. What do you prefer?

Tangible industry, enterprise, job and career opportunities for people to stay and build in a community for the long term, to have a life and future for themselves, their family, community and for the next generation is something we can be a part of, with powerful freedom of choice!

Customers and people that experience the Ultimate Flying Machine Adventure can have an incredible confidence and future, one that is backed up by super calibre personnel, a supportive community, a dynamic industry, dedicated investors and brilliant imagination and character hard at work, all within a unified Vision.

Now, finally, I would like to thank you for your time and interest in finding out about our Personnel Vision. With good people and make it happen action, imagination is the path to productivity and creating the future, the alternate reality.

Everything I choose to do, is done with my heart and soul, imagination, determination, inspiration and energy. I take great pride in all my work, and enjoy and desire to work with those with the same values, solid character, optimistic, constructive and positive attitude that can transform reality. I really look forward to build great things together with the right kind of people, the kind who want to experience the Ultimate Flying Machine Adventure!!

Michael Comeau, CEO Comeau Aerospace Inc.
