

Comeau Aerospace Inc.

Explore

Explore with Comeau Aerospace Inc. and step into the next dimension of incredible potential that is inviting, intriguing and inspiring. Imagine for a moment, the freedom to explore the incredibly dynamic possibilities of creating and living the most thrilling aerospace adventure of all time. This begins with an individual with brilliant technical genius, the faculty of creative imagination, the spirit and energy of aerospace and an idea and vision of what is possible.

This adventure includes exploration and discovery, it involves exhilarating work, abundant opportunities for learning, growth, investment, creativity and productivity that is visionary, dynamic, alive and comprehensive. This adventure offers an environment rich with awesome challenge and unparalleled reward of excellence, super-achievement, experiences and friendships to last a lifetime. This is a quest that goes beyond conventional everyday reality, it is alive with heart and soul dedication, with an intensity and passion fueled with magnitudes of desire and unlimited imagination to transform thought into an alternate reality, one with unlimited possibilities. The most fantastic dreams, ambitious goals and everyday diligent progress are all essential in the ultimate flying machine adventure.

We explore a magnificent vision to create an alternate reality, by developing the ultimate flying machine series, products, technology, services, research and development programs to create exciting, challenging and rewarding careers, develop markets and secure customer happiness and long term beneficial relationships. Real forward looking documents and vision.

We explore the potential of the unified efforts of people with a brilliant creative faculty of imagination, industrious work ethic and a confident attitude that enables individuals to excel, create and express without limit, a more challenging and rewarding environment for the individual, a dynamic range of skill set development, flexibility and innovative thinking for enhanced productivity and success in our ambitious goals to experience work, fun and adventure in organizational genius with a more involved, invested, intrigued, energized and enthusiastic outlook. An enterprise encounter of the creative and constructive kind.

As we explore amazing opportunities for growth in design, engineering, organization and management, manufacturing, processing and aero assembly technology, we can experience the ideals of continuous improvement dedicated to redefining the state of the art in both conventional and advanced technology, programs, projects, products and services. This generates a more dynamic industry and economic landscape, with solid quality good paying family rated careers for people in aerospace, aviation, aeronautics and related industries related companies with a more ideal quality of life, that is awesome for families, communities and the nation.

Explore the vision that sees far and wide in a panorama of spectacular views and perspective as we work to build a more energized, creative and successful Canadian aerospace industry. As we develop our faculties and resources, investing in greater research, design engineering and production capabilities and effort, our ability to transform that vision into reality that intense desire and imagination into transforming consciousness, experiences and life without equal.

Now, imagine for a moment, as you smile and your eyes sparkle with delight, in knowing what it is like, being in the epic moment of time, doing, having, being and achieving, something great, having that secret of the heart, locked in the secret vaults of time, that yearns to know and explore the brand new emotion of the ultimate flying machine adventure.

Your heart knows that your soul loves adventure...the ultimate flying machine adventure!
