

Comeau Aerospace Inc. - Advanced Projects  
The Ultimate Flying Machine Design Engineering Projects

**CAI-821 Fortress : ACI-821 la Forteresse**

- The revolutionary, awesome, bold and futuristic Fortress, was actually the predecessor of the brilliant imagination and creative lines that developed into the Castle, a completely new and different class of the ultimate flying machine creation.
- Massive, dynamic, curvaceous and fluid aero-structural design elements.
- You will hard pressed to find a flat surface anywhere - stealth by design;
- As a super armada marine UFM, it is amphibious, strategic, tactical and operational;
- conventional and magnetohydrodynamic drive units for marine propulsion;
- conventional and advanced main propulsion for air and marine environments;
- Low and high speed climb, vector and maneuvering agility;
- Considerable airlifting capacity is available, but dedicated to purposeful mission tasking;
- An awesome array of deployable resources and logistics;
- UFM super-interlock for extreme launch, landing, maneuvering and augmented capabilities;
- dual massive cargo bay for UFM, land and marine vehicle launch, landing and retrieval;
- all weather, does not need a sunny day or stars and moonlight to fly...more advanced eh...
- General and custom payload, asset and cargo loading, extraction, delivery and more;
- multiple decks and internal lift platform with dual deck double cargo ramp/doors;
- all weather craft deployment for air, space, land and marine traffic management;
- strategic and tactical landing craft for limited access and littoral areas;
- autonomous energy systems, communications, navigation, stockpile, deploy and reload;
- multi-mission equipped and special purpose configured for complex intense scenarios;
- custom weapons configuration ;
- armored with all kinds of immediate and remote counter measures...of course...
- EMP and solar flare proof...brilliant snow and ice remover;
- Enable, augment and amplify total force logistics;
- auxiliary massive dual ski planned for snow and tundra topography, ice, water, snow, land;
- Faster, slower, stealthy, fully loaded, all business but not as quiet as a church mouse;
- additional conventional and advanced capabilities found in other UFM series.
- long term multi-generational development platform like the Castle;

*Did you ever imagine the Fortress of solitude  
or aerial supremacy could be anything like this?*

*Are you curious, intrigued or excited about awesome possibilities?*

*Maybe it is time to get started today, personally with*

**CAI-821 Fortress**

*The Ultimate Flying Machine Adventure...*
