

Comeau Aerospace Inc. - Advanced Projects

The Ultimate Flying Machine Adventure – Design Engineering Projects

CAI-823 Stealth Space Invader

- SSTO – single stage to orbit – faster operational response and more economical
- National Turbo-machinery & Propulsion Inc. - Iroquois Renaissance Mk2 turbojet/ramjet
- lower launch and operational cost – advanced modern engine redevelopment
- optimized external atmosphere for air breathing engines, less mass, more speed
- National Turbo-machinery & Propulsion Inc.: ACN, aerospike, altitude compensating nozzles
- variable geometry capacity/thrust output on ACN modules array:
- massive thrust to weight – mind boggling even if you are really good at math...
- integrated liquid oxygen/fuel engines for high altitude and space environments
- Fortanium Advanced Materials Inc. – science, art, industry and imagination
- As-Garde Aerospace and Electrodynamics Inc. - mass and friction heating reduction
- electrodynamic technology - you would not believe it if we told you...
- anti-gravity and gravity field technology : a powered slower more controlled cooler re-entry
re-write escape velocity equations...
less thrust required and faster escape velocity – basic math...
a more comfortable natural earth like gravity field, stay in shape...
- autonomous energy and life support systems – independence is everything
- extreme environments – normal for a Canadian, space boots, yes – snowshoes, no
- space cargo logistics - conventional airport, take off and landing,
- integrated multi mission and material logistics, cabin/cockpit emergency separation

Your idea of space and space travel is about to change,
but then again so is your understanding of reality.

We will start with things you can understand,
of course, the advanced and innovative,
brilliant imagination, without limits
create adventure and possibility
out of thin air and into space.
Courage, initiative, audacity,
the resolution to succeed,
the dreams of the heart,
the genius of the soul,
trust in your destiny
the secret vaults of time
the secrets of the rocket race
fantastic, amazing reality hidden
right before your eyes, an equation
astronomically exceeding conventional
alpha-numeric recipes and co-operation,
the limitless individual creative imagination
who is not afraid to talk to God, or the unknown
and discover the secrets of the universe that wait.

CAI-823 Stealth Space Invader

Are you ready for more excitement and something a lot more up to speed?
